

NURSING & ALLIED HEALTH DATABASES @ WEIS LIBRARY

The following databases are authoritative sources for nursing and allied health information, books, e-books, and journal articles.

ENCYCLOPEDIAS

[Access Science](#) is an online encyclopedia that covers all the major scientific subject areas, including the health sciences. It contains more than 8,500 scientific articles, 115,000 scientific definitions, and 3,000 biographies of scientific figures. Access Science includes McGraw-Hill's *Encyclopedia of Science and Technology* and *Yearbook of Science and Technology*. It also links to primary research materials, videos, and animation.

[Britannica Academic](#) is a comprehensive online encyclopedia for general reference and research. It contains articles about many topics in the humanities, social sciences, and sciences, including medicine. The encyclopedia also provides access to related resources like magazine and journal articles, e-books, images, audio and video clips, and primary sources.

E-BOOKS

[eBook Collection](#) is a database that contains thousands of multidisciplinary e-book titles representing a broad range of academic subject matter, including art, business, education, health, history, law, mathematics, medicine, political science, religion, science, and technology. This searchable database provides access to the full-text of each publication.

[ProQuest Ebrary Ebooks](#) is a multidisciplinary database that provides access to over 120,000 e-books about a wide range of subjects. They include anthropology, business, computers, economics, education, history, language, literature, medicine, nursing, physical sciences, political science, psychology, and religion. The e-books can be read online or downloaded to a computer or device for a limited time.

JOURNALS

[Academic Search Complete](#) is a multi-purpose database that includes both popular magazines and scholarly journals about many subjects in the humanities, social sciences, health and medicine, as well as science and technology. Over 4,600 of these publications are available in full-text; and nearly 3,900 of the publications contain articles that were peer-reviewed by experts in the fields of study.

[CINAHL Plus with Full Text](#) is a database that indexes more than 4,900 journals and provides full-text access to nearly 800 nursing and allied health journals. It also covers health care books, nursing dissertations, conference proceedings, standards of practice, audiovisual resources, book chapters and more. The database contains over 4.2 million records, and full-text coverage dates back to 1937.

[Full-Text Finder](#) is an information service that will help you to discover whether a specific journal or magazine is available in electronic form through any library databases. If so, Full-Text Finder will reveal which databases contains that publication. Also, this online tool enables you to conduct searches directly within a journal or magazine when the full-text is available in a library database. These features make Full-Text Finder an useful resource for tracking down that list of periodical articles for which you only have citations. It will enable you to quickly determine whether the library has the publication you need.

[Health Source: Consumer Edition](#) is a database that provides access to consumer health information through nearly 80 full-text consumer health magazines. The topics covered by the database include the medical sciences, food sciences and nutrition, childcare, sports medicine and general health. The database also includes over 100 health reference books that can be searched.

[Health Source: Nursing/Academic Edition](#) is a database that includes over 350 full text scholarly journals on nursing and the allied health professions. It covers subjects like pediatric nursing, critical care, mental health, nursing administration, medical law and more. The database indexes and abstracts over 800 periodicals, and nearly 300 of the full-text journals are peer-reviewed.

[Medline](#) is a database that provides access to authoritative information on health, medicine, nursing, dentistry, veterinary medicine, the health care system, pre-clinical sciences, and beyond. It includes citations and abstracts from over 5,600 current biomedical journals and full-text access to selected publications. Dating back to 1946, the database has over 24 million references to journal articles.

[ProQuest Nursing & Allied Health Source](#) is a database that provides access to healthcare information covering nursing, allied health, alternative and complementary medicine, and more. It indexes and abstracts over 850 titles, and contains more than 715 titles in full-text. The database also includes nursing reference books, dissertations, and videos.

NEWSPAPERS

[National Newspaper Core](#) is a searchable database of local and national newspapers, including *The Baltimore Sun*, *The Christian Science Monitor*, *The New York Times*, *The Wall Street Journal*, and also *The Washington Post*. The database provides access to the full-text of the newspapers from the 1980s or 1990s to the present. This includes any coverage of health and medical issues or developments.
