

LIBRARY DATABASES FOR HEALTHCARE ADMINISTRATION

The following library databases are excellent resources for conducting healthcare administration research.

reference books

[Access Science](#) is an online encyclopedia that covers all the major scientific subject areas, including the health sciences. It contains more than 8,500 scientific articles, 115,000 scientific definitions, and 3,000 biographies of scientific figures. Access Science includes *McGraw-Hill's Encyclopedia of Science and Technology* and *Yearbook of Science and Technology*. It also links to primary research materials, videos, and animation.

[Oxford Quick Reference](#) is a database of academic subject, language, and quotations dictionaries published by Oxford University Press. It contains over 300 dictionaries that cover subjects like art, business, history, language, law, literature, medical sciences, music, performing arts, philosophy, political sciences, religion, science, social sciences, and technology.

electronic books

[eBook Collection](#) is a database that contains thousands of multidisciplinary e-book titles representing a broad range of academic subject matter, including art, business, education, health, history, law, mathematics, medicine, political science, religion, science, and technology. This searchable database provides access to the full-text of each publication.

[ProQuest E-book Central](#) is a multidisciplinary database that provides access to over 187,000 e-books about a wide range of subjects. They include anthropology, business, computers, economics, education, history, language, literature, medicine, nursing, physical sciences, political science, psychology, and religion. The e-books can be read online or downloaded to a computer or device for a limited time.

business journals

[ABI/INFORM Global](#) is a comprehensive database for both business and financial information. It contains more than 4,700 publications, including full-text journals, trade books, dissertations, conference proceedings, and market reports. The database includes topics such as business conditions, management techniques, business trends, management practice and theory, and corporate strategy and tactics.

[Business Source Premier](#) is a business research database that provides the full text for over 2,300 journals and contains 1,100 peer-reviewed publications. It includes business areas like accounting, finance, economics, marketing, management, and production and operations management. This database extends back to the nineteenth century.

[Journal Finder](#) is an online guide to the full-text periodicals available through the library's databases. This research tool provides the option to browse or search for specific journal and magazine titles to determine whether electronic access is granted to them by Weis Library. If this is so, Journal Finder will display links to the periodicals and note the years of coverage available. For example, if you conduct a search for *Healthcare Executive*, this tool will show that this periodical is available in the CINAHL Plus database from 2007 to 2017.

health journals

[CINAHL Plus with Full Text](#) is a database that indexes more than 5,500 journals and provides full-text access to nearly 300 nursing and allied health journals. It also covers health care books, nursing dissertations, conference proceedings, standards of practice, audiovisual resources, book chapters and more. The database contains over 7.5 million records, and full-text coverage dates back to 1937.

[Health Source: Nursing/Academic Edition](#) is a database that includes over 320 full text scholarly journals on nursing and the allied health professions. It covers subjects like pediatric nursing, critical care, mental health, nursing administration, medical law and more. The database indexes and abstracts over 840 periodicals, and nearly 250 of the full-text journals are peer-reviewed.

[ProQuest Nursing & Allied Health Source](#) is a database that provides access to healthcare information covering nursing, allied health, alternative and complementary medicine, and more. It indexes and abstracts or provides full-text access to over 2,000 periodicals. The database also includes nursing reference books, dissertations, and videos.

newspaper articles

[National Newspaper Core](#) is a database that contains both national and local newspapers. The publications include the *Baltimore Sun*, *Christian Science Monitor*, *New York Times*, *Wall Street Journal*, and *Washington Post*. For each paper, the database provides access to the full-text of news content from the 1980s or 1990s to the present.

[Regional Business News](#) is a database that allows full-text access to regional business publications from the United States and Canada. It includes 40 publications that cover metropolitan and rural areas, and content from newspapers, radio and television programs, magazines and newswires, and trade magazines dating back to 1990.
