

MULTIDISCIPLINARY SOURCES @ WEIS LIBRARY

Multidisciplinary sources can be used to research subjects in many disciplines or areas of study.

REFERENCE

[Britannica Academic](#) is an online encyclopedia for general reference and research. It contains entries on topics in the humanities, social sciences, and science and technology. It also provides access to thousands of related resources like magazine and journal articles, e-books, images, audio and video clips, and primary source documents.

[Oxford Quick Reference](#) is a database of academic subject, language, and quotations dictionaries published by Oxford University Press. It contains over 300 dictionaries that cover subjects like art, business, history, language, law, literature, medicine, music, performing arts, quotations, philosophy, religion, science, social sciences, and technology.

BOOKS

[eBook Collection](#) is a searchable database that contains thousands of multidisciplinary e-book titles representing a broad range of academic subjects, including art, business, education, history, law, mathematics, political science, and technology. For each title, the database provides access to the full-text, and the pages can be saved as PDF files.

[ProQuest Ebook Central](#) is a multidisciplinary database that provides access to over 187,000 ebooks about a wide range of subject areas and that can be downloaded. The topics include anthropology, business, education, history, language, law, life sciences, literature, medicine, physical sciences, political science, religion, and sociology.

[University Press Collection](#) is a database of multidisciplinary scholarly e-books from over 90 university presses from throughout the world. The e-books cover a wide variety of topics in the humanities, social sciences, and sciences and technology. The database contains titles suitable for varied audiences – from introductory texts to high level research.

[WorldCat Discovery](#) is a database of the resources that are available in Weis Library. It describes and provides access to the library's print and digital books. For print books, the database identifies where they are shelved in Weis Library; and for e-books, it provides direct links to the full-text of the publications. Combining the functions of a traditional library catalog with the feel of a modern search engine, WorldCat Discovery is the recommended starting point for conducting research at Weis Library. Further, this research tool enables students and faculty to identify information resources that are located in other libraries throughout the United States and electronically requests them through interlibrary loans.

“When it looked like the sun would not shine anymore, God put a rainbow in the clouds. Look at that — look at that! That’s a library — a library is a rainbow in the clouds.” ~ Maya Angelou

JOURNALS

[Academic Search Complete](#) is a multidisciplinary database of journals and magazines covering a wide range of topics in the humanities, social sciences, medicine, sciences, and beyond. More than 8,500 of these sources are available in full-text; and approximately 7,300 of the publications contain articles that have been peer-reviewed by experts.

[Journal Finder](#) is an online guide to the full-text periodicals available through the library's databases. This research tool provides the option to browse or search for specific journal titles to determine whether electronic access is granted to them by Weis Library. If so, Journal Finder displays links to the journals and notes the years of coverage available.

[JSTOR](#) is a database of archived scholarly journals from the humanities and social sciences. For each journal, it contains the first issue published through issues published within the past three to five years. The journals cover fields like music, art, economics, history, political science, sociology, ecology, language, mathematics, literature, and religion.

ISSUES

[CQ Researcher](#) is a database that provides comprehensive reports on current social and public policy issues dating back to the 1920s. For each issue, the reports include an overview, historical background, chronology, pro/con features, and resources for additional research. The reports also contain many graphics, photos, and sidebar features.

[National Newspaper Core](#) is a searchable database of the following national and local newspapers: *Baltimore Sun*, *Christian Science Monitor*, *New York Times*, *Wall Street Journal*, and *Washington Post*. For each newspaper, the database provides access to the full-text of articles dating from the 1980s or 1990s to the present.

VIDEOS

[Films On Demand](#) is an online streaming video service that provides access to a collection of over 44,500 educational films from more than 700 producers. The streaming videos may be watched in segments or in their entirety, and cover a variety of subjects, such as art, business, communication, education, history, music, political science, and sociology.
